

## 6. Demographic details of prisoners

The Prison administration compiles the demographic details of prisoners on the basis of information supplied by them at the time of their admission in jails.

### A. Marital status :-

As per figures available with Prison Administration, the married people constitute 52.53% of total male population whereas unmarried form 47.47%. 81.19% of female population were married and 18.81% were unmarried. During the year 2009 the percentage of male married inmates was 51.46% and female was 80.75% and male unmarried population was 48.54% and female 19.25%. Thus there is decline of about 1% in male married inmates and corresponding increase in the unmarried whereas in the female category there is increase of less than 1% in the married population and corresponding decrease in the unmarried population. This is reflected in Table A below:-

**Table A**

	(% age)	
	Male	Female
A.1 Married	52.53	81.19
A.2 Un-married	47.47	18.81

### B. Educational standard :-

Majority of the prison population (around 66%) have education below class-X, thus proving the linkage between low education standards and criminality. **Lesser the literacy, more the inclination towards crime.** The comparison between figures of shows the same trend.

**The Prison administration is taking every are centers of National Institutes of Open education to the prisoners. More emphasis prison. Adult education classes are organ prisoners at the time of their admission in**
